## Weight limit for manipulating loads

VAT Vakuumventile AG confirms that all VAT products comply with the relevant directives in place in the European Union to ensure the health and safety of consumers.

Extract from the Machinery Directive 2006/42/EC; EN 1005-2 Safety of machinery – Human physical performance – Part 2: For manual handling of objects in connection with machines and machine parts, the manual handling without lifting aids is limited to 25 kg.

VAT products that exceed this weight limit or may exceed it as a result of adding options are equipped with anchor points.

Further information on handling VAT products can be found in the corresponding operating manual.

If you have any further questions, please contact our Global Quality Department as follows:  
Rami Musliu, Seelistrasse 1, CH-9469 Haag, E-mail: [qualitych.support@vat.ch](mailto:qualitych.support@vat.ch)

A handwritten signature in blue ink, appearing to read 'R. Musliu', written over a horizontal line.

Rami Musliu
